

SPORTS TURF MANAGEMENT & MAINTENANCE COURSE

FOR BETTER, SAFER SPORTS TURF!

2.5 Day Natural Management & Maintenance

The course will be of interest to those who manage or maintain sports turf or want to learn more about it, and those who wish to develop additional knowledge, past the fundamentals. The course offers a range of options to deal with issues such as restricted pesticide use, water use, common regional issues, limited equipment availability and how best to manage within limited financial resources.

Topics Include:

- Turf species and their uses, characteristics and benefits.
- Seeding, sodding & fertilizing.
- Management of soil for better field performance.
- Thatch, aeration, topdressing and overseeding practices for optimal turf and improved playing conditions.
- Water management including drainage systems, irrigation practices, and efficient use of water.
- Weed, insect and disease identification, monitoring, and control.
- Integrated pest management (IPM) programs using biological and cultural methods .
